React TypeScript Astro Tailwind CSS

Headless UI Node.js NestJS Express

GraphQL REST C# Azure AWS

Google Cloud Azure Functions

Event-driven systems

EDUCATION

Master of Science in Computer Science

Hogeschool Gent (BMI)

2007 - 2012

Industrial Sciences

VTI Ieper

2001 - 2007

EXPERIENCE

Senior Cloud, IoT & Full Stack Engineer

OCTOBER 2016 - PRESENT

Aptus IoT Solutions

Senior engineering role spanning industrial IoT, cloud architecture, platform engineering, and modern application delivery.

- Designed and delivered cloud-native and Kubernetes-based platforms for industrial and operational use cases.
- Architected Azure IoT Edge solutions to integrate machine protocols such as Modbus, OPC UA, CAN, Siemens S7, and P1 into usable product platforms.

Analyst Developer

OCTOBER 2015 - OCTOBER 2016

BMSvision

Worked on enterprise software as an analyst developer with a focus on backend and frontend delivery in an existing product environment.

- Backend development in C# within an ASP MVC 4 environment.
- Frontend development in AngularJS, TypeScript, and Knockout.

Software Engineer

JULY 2012 - OCTOBER 2015

Transics, now ZF Group

Built software in a mature product environment with requirements around reliability, integration, and long-term maintainability.

- Developed backend services and frontend capabilities across multiple generations of the platform.
- Delivered SSO capabilities and contributed to broader application modernization efforts.
